

A CyberTrust Company

Tailor Made Services

Mitigate risks with DRS:

Secure cyber resilience in your business with DRS' cyber security services- fuelled by specialist skills and knowledge dedicated to keeping your IP and data assets safe.

We customise flexible solutions to your company's needs, by combining onsite or remote support services and utilising a combination of automated toolsets and resources.

Managed Security Services:

"Access the skills and resources you need to ensure cyber resilience"

Alongside today's surge in the sophistication of cyber threats, security standards are becoming increasingly complex. Yet, security budgets are shrinking, forcing businesses to try to do more with less. This is placing a tremendous stress on organisations when it comes to the control and management of IT security.
