

Information, Protection & Control

The protection of information is critical in today's threatened landscape, as it equates to revenue. Understanding data breaches, accompanied by significant statistics relating to financial losses and the integrity of your company's brand value, allowing us to help you get a better understanding of what is at stake. At DRS, we pride ourselves in being able to assist our clients to manage the governance and assurance techniques required to enable you to deal with the issue of protecting your company's information, as well as understanding the lifecycle and flow of intellectual property.

We focus on:

- Data protection across the organisation: Network or endpoint
- Encryption | Device control | Application control
- Prevention readiness | Monitoring | User behavioural changes
- Reporting and business DLP success metrics
- Ongoing services to empower clients
